

CUSTOM UNITS

CUSTOMIZE TO FIT YOUR NEEDS

CUSTOM PRODUCTS

When a standard product simply won't do the trick, make sure and ask about Blackline's ability to customize one of its existing units to fit the needs of your business.

We've built everything from 12-foot washout booths for flag printers to oversize filtration systems and large-capacity diptanks. Our engineering department uses Solidworks 3D modeling software in the design process, and every product is cut on Blackline's state-of-the-art CNC router. From there, our highly-skilled fabricators ensure your custom product is built exactly to your specifications.

From sales to engineering, fabrication to shipping, our staff will help you take your custom design from concept to creation.

CUSTOM POSSIBILITIES:

- Oversized and multi-compartment washout booths
- High-volume filtration systems
- Large-capacity diptanks
- Additional backlighting
